Colored Stainless Steel Baseboard | Protek System: Colored stainless steel baseboard protects walls from impact and creates a clean and attractive transition from wall to floor. Colored stainless steel adds visual appeal and allows for more design options. Protek colored stainless steel baseboard consists of a plywood backer that mounts directly to the wall with a colored stainless steel cover that mounts to the plywood with adhesive or mechanical fasteners. Outside corners are also available for wrapping corners, which allows the baseboard to be installed in a continuous fashion. Colored stainless steel baseboards are supplied in standard lengths and cut to fit in the field by installers, which means no prior field measuring is required. Choose several standard sizes and color options below or inquire about custom options that meet your specific project requirements.

Features:

??Manufactured from type 304 #4 satin finish colored stainless steel

??Butt seams

??Outside corners available for a continuous installation

??Installed with adhesive or mechanical fasteners, pre-drilled holes available

??Standard and custom heights available

??Other stainless steel grades and finishes available
