1.5A PVC Bendit for Heating and Bending
up to 18 inch Bends in 1/2" ID and Larger
PVC Schedule 40-80 Pipe 120V 169W
1.4A
PVC Bendit
\$149.00
\$99.00

Address: **17 N. Circle Drive, Colorado Springs**

Price: **99.00 \$**

Pvc Bendit: Started as a brainchild of the late Victor Johnson who said "PVC Bendits help shape the future of PVC". Vic designed the PVC Bendits to be different lengths so one can make sharp or sweeping curves or bends in PVC Pipe which allows for the realization of what is needed and or imagined.

PVC Bendits are designed for usability, portability and affordability. Surpassing other heating/bending tools in the market because of their availability in 6 different lengths from 18 inches to 20 feet and a small diameter to fit inside 1/2 ID pipe. They heat to approximately 950 degrees Fahrenheit using 120 volts and 10 or less amps.

In addition to PVC Pipe they are used to heat flat PVC, PEX, PTFE Teflon, or acrylic for bending.

Whether you require a sweeping bend, compound bend or other use the beneficial functions of PVC Bendits should exceed most users expectations.
