Address: **11515 Crosby Freeway,, Houston, TX 77013, Houston**

Price: **Free**

Strong and Stable Alum Scaffold Planks: Here are aluminum scaffolding planks for sale series models offering a sturdy, stable working and standing platform. The 7 ft can carry 75 lbs per square foot, while the 10 ft plank can carry 50 lbs per square foot and exceeds OSHA's heavy-duty loads standard. They come with heavy-duty reinforced undersides that offer extra strength, while the grooved top surface on this product prevents water from collecting and gives an assurance of a good footing. Their light weight makes them easy to move around and assemble. Aluminum planks do not rust as their counterpart wooden boards do, hence durable for years to come.
