The Best Credit Card Processing Company In The United States and Canada

Address: Alexandria
Price: Check with seller

Make Great Up Front Money and Huge Monthly Residual Income For Years To Come!: We are in the credit Card processing business. That is where we set businesses up to be able to process credit cards. I have been in the business for over 32 years. I set up a restaurant 32 years ago and I have been getting over \$700.00 in monthly residual income from that one account for over 32 years. That amounts to over \$268,800.00 from that one account so far. Have you ever made that much money from one sale?

You are paid \$200.00 per sale and in the second month your monthly residual income starts coming in. Most of our people are making between 20 to 30 or more sales per month. In the last year in the United States over 5,500,000 new businesses started up. You are provided between 400 to 600 leads monthly of new businesses that started up in the last week. At least 85% of them will want to process credit cards. In addition to providing them very competitive credit card processing rates and one of the best customer service and tech support departments in the industry. Which is very important in this industry. We also provide them 6 things that every business should have. They are absolutely free to them. If they had to pay for them, it would cost them thousands of dollars.

If you might be interested in doing business with us send us your email address. Mention the
