Adaferin Gel 0.1% (15gm) | Differin | Adapalene | It's Uses | Side Effects: Adaferin Gel 0.1% (15gm) is a topical medication used for treating mild to moderate acne. Its active ingredient, Adapalene, belongs to the retinoid class of medicines, known for reducing inflammation, preventing clogged pores, and promoting faster skin cell turnover. Adaferin Gel works by targeting the underlying causes of acne, such as excess oil and dead skin buildup, while improving skin texture and reducing the appearance of blemishes.
